SUMMARY

Aspiring Backend Engineer with a strong foundation in computer science and hands-on experience in optimizing web performance. Successfully reduced website load times by 50% at Zurit Consulting using backend technologies like Flask and FastAPI. Eager to apply technical expertise in backend development to create efficient and scalable solutions.

EDUCATION

Strathmore University

Bachelor of Computer Science (GPA: 3.8)

- **Achievements:** Dean's list award

Jul 2021 - Present

Nairobi, Kenya

JUNIA ISEN

Masters Level One

Jan 2025 - Present

Lille, France

Work Experience

Zurit Consulting | Full-Stack Developer Intern

Jan 2024 - Jun 2024

- Developed and optimized company website features using Laravel and JavaScript, reducing load times by 50% and improving user experience
- Implemented reusable components and minimized CSS files to enhance website speed and performance
- Created a personal website for the CEO using Flask and Vue.js, achieving high client satisfaction and enhancing the CEO's online presence
- Managed email services using Namecheap to streamline team communication, resulting in improved project collaboration and efficiency

CERTIFICATIONS

- **CCNA: Introduction to Networks | Cisco Networking Academy:** Solid understanding of network structures, protocols, and problem-solving in networking.
- **CCNA: Switching, Routing, and Wireless Essentials | Cisco:** Demonstrated a solid expertise in switching, routing, and wireless networking, VLANs, routing protocols, and secure network design.

PROJECTS

TaxIQ | NLP

Sep 2024 - Nov 2024

- Developed a WhatsApp-based NLP solution using Flask, Twilio, and phi-3 model to educate Kenyans on tax regulations.
- Technologies: Natural Language Processing, Firestore, Flask, Twilio API, Python

Zurit Consulting | Full Stack

Feb 2024 - Jul 2024

- Built a web application for financial tracking, allowing users to manage investments, expenses, goals, and net worth.
- Technologies: Coronavirus, MySQL, OTP, Figma, PHP, JavaScript

Elizabeth Nkukuu | Blog

Feb 2024 - Apr 2024

- Created a blog website for a professional figure to share experiences and advice.
- Technologies: Coronavirus, Vue.js, MySQL, Figma, PHP, JavaScript

Restaurant Recommender System | Machine Learning

Jan 2023 - Apr 2023

- Developed a restaurant recommendation system using content-based filtering, providing personalized suggestions based on user preferences.
- Technologies: Context-based recommendation algorithm, Tensorflow, NumPy, Pandas, Figma, Python

Load Balancer Implementation | Back-end

Aug 2024 - Sep 2024

- Collaborated in a team of 4 to build a load balancer using Docker to distribute server requests and ensure high availability.
- Technologies: Docker, Python

VR Space | Frontend

Jun 2024 - Jun 2024

- Designed and developed a website to showcase VR Space KE's business offerings.
- Technologies: Vue.js, JavaScript

SKILLS

- **Skills:** French, English
- **Technical Skills:** Python, PHP, JavaScript, HTML, CSS, React, VueJS, React Native (Expo), Flask, FastAPI, Tailwind CSS, TensorFlow, NumPy, Large Language Models (fine-tuning, prompt engineering - Langchain, RAG), MySQL, PostgreSQL, Firestore, Vector Databases, Redis, Azure, Amazon Web Services (AWS), Docker, Ubuntu
- **Soft skills:** Problem solving, Analytical thinking, Adaptability, Public speaking, Oral presentation, Teamwork, Time management, Passionate, Attention to details
