

MYLES ADEBAYO JOHNSON

Nairobi, Kenya

+254-790-518-867 [✉ mylesadebayo2021@gmail.com](mailto:mylesadebayo2021@gmail.com) [in](#) [LinkedIn](#) [GitHub](#)

Skills

- **Programming:** Java, JavaScript, Tailwind Css, C++, PHP, Python, Laravel, Flask, VueJS, ReactJS, React Native Flutter, Springboot, GenerativeAI, Typescript
- **Tools:** Visual Studio Code, Docker, AWS, MySQL, Postman, Azure, TensorFlow, Pandas, NumPy, Linux, API's

Experience

Mintel Solutions | Internship

Jan 2024 - Mar 2024

During my internship at Mintel Solutions, I developed Java applications, leveraged APIs to streamline processes, and improved data integration.

- Developed Java applications that enhanced system performance and user experience
- Leveraged APIs to streamline processes, resulting in reduced processing time and increased efficiency
- Improved data integration, leading to more accurate and timely data analysis
- Generated reports and presentations that facilitated informed decision-making by stakeholders
- Strengthened technical skills in Java and API utilization, contributing to more efficient coding practices and project outcomes

KION Consulting South Africa | Vacation Program

Jan 2025 - Feb 2025

Comprehensive training program at KION Consulting South Africa, focusing on the Murex trading platform.

- I acquired practical experience in essential financial technology, including Murex operations, XML, Unix, SQL, and trade processing workflows, which improved my ability to manage complex financial systems
- Enhanced my understanding of financial market operations and trading systems, enabling me to contribute effectively to financial technology projects

Education

STRATHMORE UNIVERSITY

Jan 2021 - Dec 2024

Bachelor of Science, Informatics and Computer Science (GPA: 3.4)

Nairobi, Kenya

Projects

Travel Agency Web Application

- A travel agency system that helps clients book their flights, accommodation, and transportation to a destination of their choice within Kenya.
- This system is also aimed at helping locals and foreigners discover places in Kenya easily.

Yoruba Movie Sentiment Analysis Project

- The Yoruba Movie Sentiment Analysis project is an exciting and innovative endeavor that I have undertaken to gain valuable insights into the sentiments and emotions expressed within Yoruba language movie reviews and discussions.
- This project leverages natural language processing (NLP) techniques to analyze and understand the sentiments associated with Yoruba movies, a significant cultural aspect of the Yoruba-speaking community.

A2SV Hackathon Competition Participant (Semi-Finals)

- Advanced to the semi-finals with the "Smart Farming Advisor" project, providing farmers with personalized insights on crop selection based on geographical location and soil conditions.
- Aiming to revolutionize agriculture through data-driven recommendations.

Visa Applications Website

- Built and hosted a website for visa applications through a third party for a client.
- The website facilitates the visa application process, providing an efficient and user-friendly interface for customers.

IEEE | IEEE Hackathon Participant

Oct 2024 - Oct 2024

- Competed in an IEEE hackathon, a 24-hour event held from Saturday to Sunday, placed 1475th out of 8785 participants, working with a team to solve complex technical challenges under time constraints.

Swahili Tomato Farming Chatbot

- Currently developing a chatbot aimed at assisting Kenyan farmers with tomato farming.
- Responsible for the entire process, from the development of the AI model to training it with a Swahili-language tomato farming dataset.

VR Space

- Built a VR website for VR Space, showcasing the different VR activities available at the venue.
- It was developed using Vue.js.

Certifications

- **IT fundamentals:** CISCO, CCNAv7: Introduction to Networks
